Invigorate your internal environment while on the go with our affordable **Pulsed Electro-Magnetic Field Therapy** devices.

FREE SHIPPING WORLDWIDE

100% SECURE CHECKOUT

3 YEARS WARRANTY

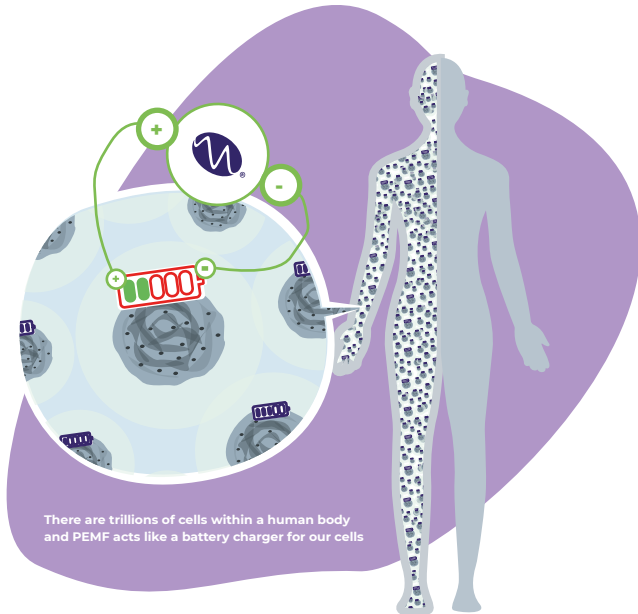

MANUFACTURED IN THE UK

# WHAT IS PEMF?

## PEMF STANDS FOR: Pulsed Electro-Magnetic Field

PEMF mimics the earth's gravitational field. By varying the Hz we can intensify the positive effects of the electromagnetic field and recharge cells to promote health and wellness.

A completely safe and non-invasive treatment that can help increase healing, immunity, recovery, circulation, and reduce inflammation, pain, and toxicity.

# HOW DOES PEMF WORK?

PEMF devices work as a **'battery charger'** for our body by energising our cells and boosting our body's natural defences.

PEMF therapy does not treat medical conditions; instead, it up-regulates the body's own ability to heal itself naturally by replenishing the natural charge that exists in healthy cells. When your body is healthy, you sleep better, experience more energy, and are less likely to experience pain and inflammation.

# WHY MAGNACARES® ?

Compared to other leading brands, the MagnaField® & MagnaField® Mini devices can be continually used to promote recovery without any adverse issues. This is because other brands are restricted to limiting their treatment sessions due to their higher hertz(Hz) output, making both MagnaField® & MagnaField® Mini devices safe for all, even for pregnant women, epilepsy sufferers, and individuals with pacemakers.

**Our Vision is to give people the power to heal naturally.**  
Giving you a healthier life without pain, without insomnia & most importantly, more time with your loved ones.

# TESTIMONIAL

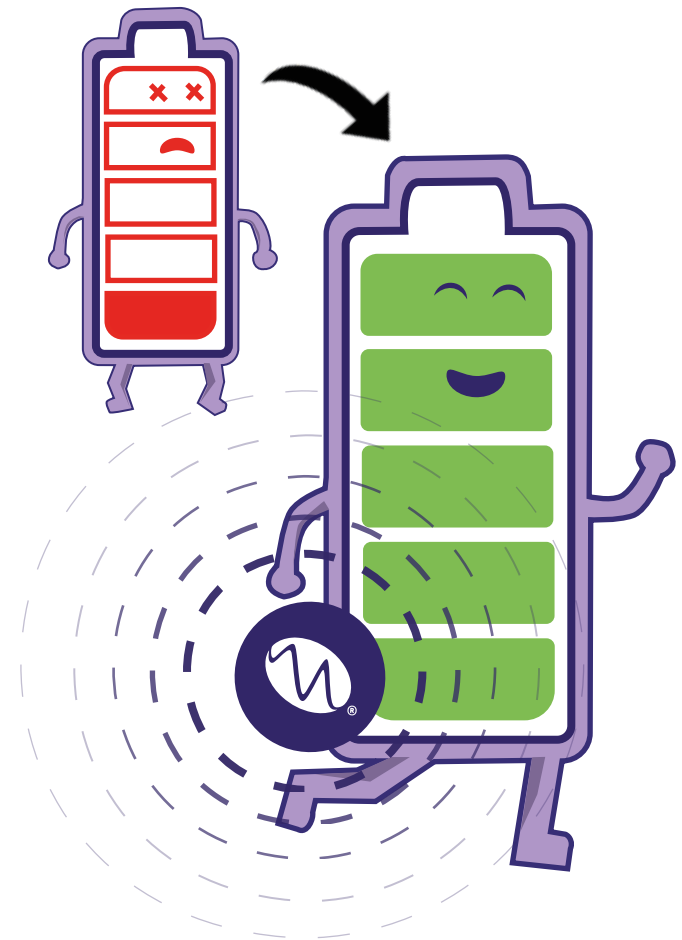

## Dr. Laurie Trapp

I suffered a bad tibia plateau fracture while mountain biking in early August 2016. My surgeon used a plate and 6 screws, along with cement, to fix it. He said from the beginning that he had never taken hardware out before 8 months of healing. I used the MagnaField® Mini faithfully as much as I could every day (just strapped it onto my leg and left it on 24/7). I had my x-rays and check-ups monthly, and in November my surgeon told me "I can't believe I am saying this, but you can have your hardware out in December, your leg looks THAT good!"

My hardware was removed in mid-December 2016, at 4 months, and I have returned to all of my previous activities with no restrictions

In short, a **human body is a battery,** and like any battery, it can run low on voltage, and that's when we start to see issues.

PEMF re-energises our body on a cellular level and invigorates our body into action, therefore providing solutions to our health and wellness problems.
