WHAT IS PEMF?

PEMF STANDS FOR: Pulsed Electro-Magnetic Field

PEMF mimics the earth's gravitational field. By varying the Hz we can intensify the positive effects of the electromagnetic field and recharge cells to promote health and wellness.

A completely safe and non-invasive treatment that can help increase healing, immunity, recovery, circulation, and reduce inflammation, pain, and toxicity.

HOW DOES PEMF WORK?

PEMF devices work as a **'battery charger'** for our body by energising our cells and boosting our body's natural defences.

PEMF therapy does not treat medical conditions; instead, it up-regulates the body's own ability to heal itself naturally by replenishing the natural charge that exists in healthy cells. When your body is healthy, you sleep better, experience more energy, and are less likely to experience pain and inflammation.

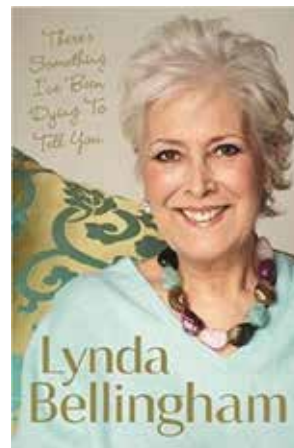

WHY MAGNACARES® ?

Compared to other leading brands, the MagnaField® & MagnaField® Mini devices can be continually used to promote recovery without any adverse issues. This is because other brands are restricted to limiting their treatment sessions due to their higher hertz(Hz) output, making both MagnaField® & MagnaField® Mini devices safe for all, even for pregnant women, epilepsy sufferers, and individuals with pacemakers.

Our Vision is to give people the power to heal naturally.

Giving you a healthier life without pain, without insomnia & most importantly, more time with your loved ones.

TESTIMONIAL

Lynda Bellingham

Sadly, we discovered I am not suitable for the test drugs they wanted to put me on, but I went to see a very interesting man called Erdal Mehmet who introduced me to a PMF machine, which has something to do with magnets and breaking up the blood cells in my body.

I did try the magnet for a month, and I had hoped that when I went to the clinic again I would see my markers had gone down, but sadly I don't think I am going to be here long enough for them to take hold.

I do recommend anyone in the early stage of cancer to go and talk to him.

In short, a **human body is a battery**, and like any battery, it can run low on voltage, and that's when we start to see issues.

PEMF re-energises our body on a cellular level and invigorates our body into action, therefore providing solutions to our health and wellness problems.
